DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-32, 81, 82, drawn to acoustic sensor in a downhole tool, classified in class 73, subclass 152.01+.
- II. Claims 33-50, 83, drawn to piezo acoustic sensor with attenuating composite backing layer, classified in class 310, subclass 327.
- III. Claims 51-77, 84, drawn to piezo acoustic sensor with impedance matching layer and barrier layer, classified in class 310, subclass 328.

NOTE: Claims 78-80, 85 are considered linking claims linking the inventions of group II and III and will be examined with either of these groups if elected.

Inventions I and II, III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because combination does not require backing, matching or barrier layer. The subcombination has separate utility such as acoustic sensor used in pipeline flow measurement.

Inventions II and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and

(2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not require a matching or barrier layer. The subcombination has separate utility such as acoustic sensor used in detecting vessel fluid leaks.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
